our company

SETECH Service GmbH was founded in 1994 and has developed in the course of time into a European-wide operating company.

Our main business concentrates on technical service in the areas of Retail trade and industry. We see ourselves as partner and consultant for our customers.

We don't offer own products. We offer innovative services to relieve our customers. Our responsibilities [competences] ranging from planning and project development through to project supervision and the complete rollout.
